Maximize your riding time with StemCaptain

The StemCaptain is a great way to replace your boring old stem cap with a clock, thermometer or compass! There's even a picture frame available! Like jewelry for your bike, it's functional and fun!

The system includes a base and spacers (you can use as many as you like)—precision CNC machined out of light and strong 6061-T6 Aluminum—to match the high-quality of your bike and look great!

Anodized in an array of vibrant colors (currently black, blue, red, gold, green, pink and natural Al), the StemCaptain will replace any 1 1/8" threadless headset stem cap. A smaller version is also available that will work with 1" or 1 1/8" sized stems.
